senator®

Made in Germany. Since 1920.

Valid from January 1, 2023

With this price list all previous prices and conditions lose their validity. All prices are industrial prices and are to be understood as recommended selling price in GBP per piece, ex works, excluding VAT. Whilst our catalogues are prepared with utmost care SENATOR GmbH cannot guarantee the completeness and accuracy of the information provided.

Dear Valued Customer,

Thank you for choosing senator® and for placing your trust in us.

After another turbulent year, we are grateful and proud that, as a family run business, we are still able to provide a quality and exceptional service to each and every one of our customers. Here at senator®, we know very well how important trust and continuity are.

We are proud to present our new catalogue and we are particularly pleased to highlight three great themes in 2023:

- **New products made from recycled materials:**

We have added three new additions to our climate-neutral recycled range and we have also expanded the colour palette of all recycled pens to a total of 11 vibrant colours.

- **Endless new combination possibilities with Mix & Match:**

We have now also added our biobased and recycled pens to the wide choice of parts for custom-made colour combinations.

- **Free refill:**

We have extended the life of our ball pens and with it your advertising impact many times over by offering the option of ordering free replacement refills.

Continuity and reliability also means to us that we always make a fair price offer to our business partners, financially provide for 200 employees in Germany and Great Britain and continuously invest in the factory in Odenwald/Germany.

Despite cost increases of far beyond 100% in some cases, we kept our prices constant in 2022. After carefully analysing our operating and overhead costs for 2022 and, due to global factors in recent times, we find ourselves with no choice but to implement some price changes that will come into effect from 1st January 2023.

This was a difficult decision to make, as we know the effect it can have on our customers. We, therefore, thank you for your understanding and support during this change, and as always, we promise to deliver the highest quality products and services possible. We guarantee that we will continue to work closely with you to support you in your projects and to help you with your budget, brand and end user.

We look forward to continue working with you.

Sincerely,

Daniel Jeschonowski
Group CEO Senator

MADE IN GERMANY

COMPLETE VALUE CHAIN IN GERMANY

All senator® plastic pens are fully produced in Germany using 100% Green electricity. For us, "Made in Germany" goes far beyond mere advertising and encompasses the entire value chain from **design and development, injection moulding, assembly and printing to logistics and quality assurance**. This means we know exactly which raw materials go into every single writing instrument.

Your advantages with senator®:

- Short transport distances and proximity to the market
- Safe and durable products
- High and uniform quality standards
- Extensive know-how with experienced employees
- Flexibility in product development

With each of our writing instruments, we achieve a leading CO₂ footprint in the industry per metre of writing length, because **in terms of ecological footprint, a product "Made in Germany" clearly exceeds other imported products.**

Senator® products are always the safe choice and fulfil all legal requirements. To us, the BSCI and Sedex membership is as self-evident as the certification according to ISO 9001 and 14001.

SENATOR® IS CLIMATE NEUTRAL

A healthy environment plays a major role for us. That is why we pay special attention to sustainable materials and production processes, ecological compatibility, waste avoidance, resource conservation and recycling. For example, we only purchase green electricity from hydropower and at the same time invest in electricity-saving measures at our production site.

Another important step in holistic climate protection is the offsetting of greenhouse gases. For us, this means not only continuing our efforts to reduce them, but also recording unavoidable greenhouse gas emissions and offsetting them

through climate protection projects. For this reason, Senator GmbH is a climate-neutral company since 2021.

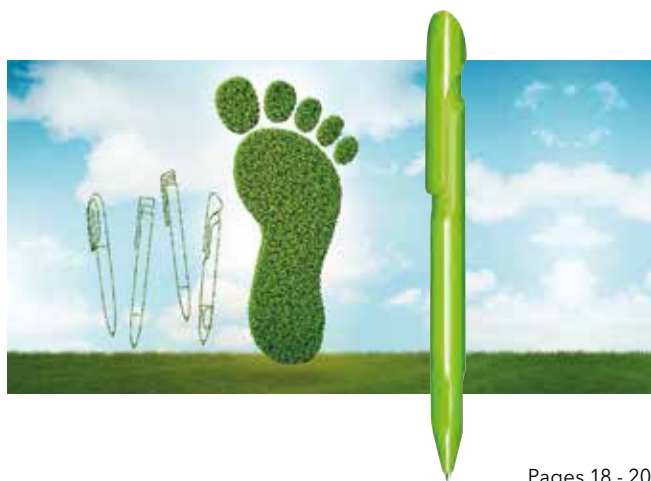

With the climate neutrality of our company, we support both regional and global climate protection projects. In this way, we also promote the achievement of the global Sustainable Development Goals, such as the fight against poverty or the improvement of living conditions in emerging and developing countries.

MADE IN GERMANY

RECYCLED PENS

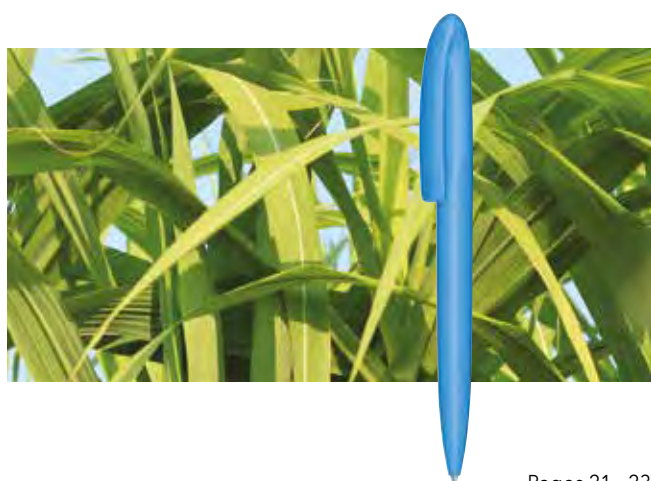

Pages 18 - 20

A total of 5 models are now available as an option made of recycled material. For the production, we use an ABS ReCompound based on >95% recycled material. This means reusing industrial production scraps and waste, returns and everyday products. The CO₂ emissions generated in the production of these products are offset by investments in climate protection projects.

BIO PENS

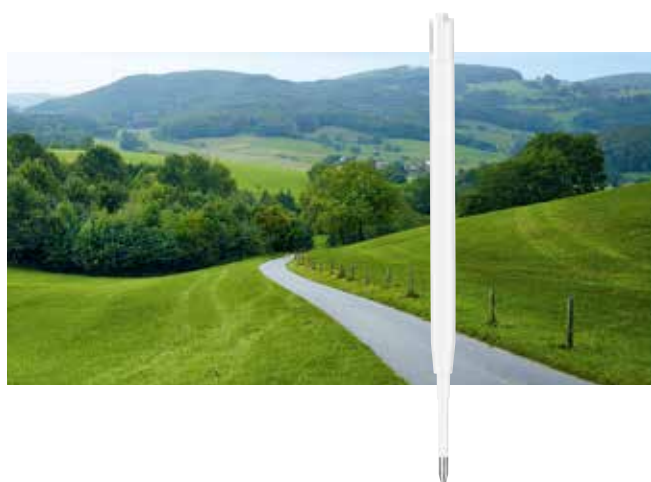

Pages 21 - 23

We have already had many years of experience in processing bio-plastic and have 4 models made of this material in our range. The bio material we process is a PLA (polylactic) obtained from sugar cane from certified GMO-free cultivation. The CO₂ emissions generated in the manufacture of these products are offset by investments in climate protection projects.

FREE REFILL

Page 16

Senator® writing instruments are designed for a long service life. This already makes a significant contribution to conserving resources. But what happens when the refill is empty? At senator®, we use commercially available refill formats that allow for replacement. We actively support this refill exchange and make it easy for users to get the right refill. Simply by placing an order online. Again and again.

refills.senator.com

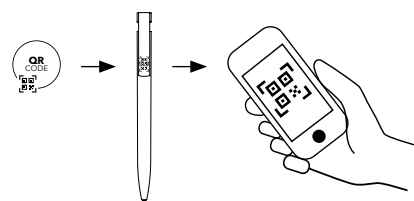

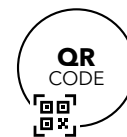

QR CODE PENS

Page 15

The senator® QR code pen offers you an ideal opportunity to link haptic advertising with the digital world - cost-effectively and very simply. All products marked with the QR-CODE logo in our catalogue are ideally suited for this type of printing. Also options with coloured or even transparent clips.

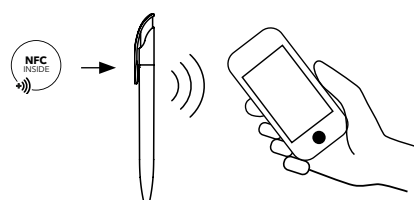

NFC PENS

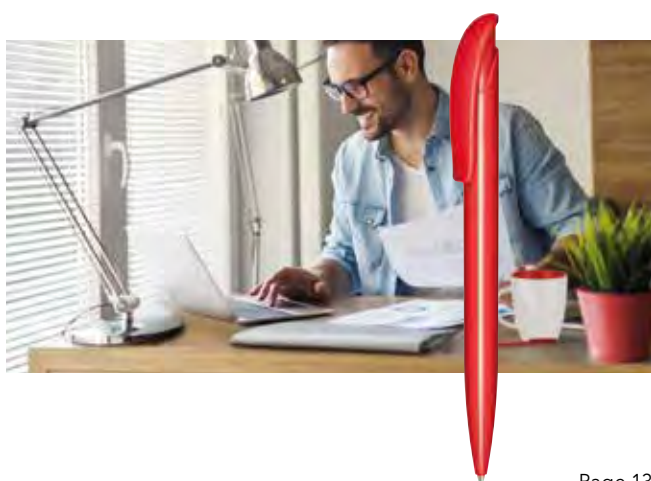

Page 14

The modern complement to digital technology and the classic ball pen: simply hold an NFC-enabled smartphone to the chip inside the pen and find linked information. In this way, a **limitless amount of information** can be included with the advertising message.

MY.SENATOR.COM

Page 13

The most popular senator® products can also be ordered online at any time. Including your own print approval. **Fast and easy.**

A large selection of plastic and metal pens, mugs and notebooks are just a click away. In small quantities and digitally printed. Even last-minute deliveries for events or sampling are no problem at all.

my.senator.com

MADE IN GERMANY

MIX & MATCH

Page 10

Set your own colour combinations and adapt your ball pens individually to your corporate design.

Many senator® ball pens can be individually mixed in colour and finish. This creates almost endless possibilities for **your personal colour combination**. The "MIX & MATCH" logo indicates which models offer this service.

Set no limits to your ideas.

CUSTOMISED COLOURS

Page 11

We produce our plastic writing instruments in our own factory. This also enables us to fulfil your individual colour wishes.

Just tell us the PANTONE® number of the colour you have chosen, and we will produce the entire pen or just a specific part in the **colour of your choice**.

Let your imagination run wild.

PRINTING TECHNIQUES

Page 92 - 95

In our 2,600 m² print shop in Germany, we brand all our products using a wide variety of printing processes, **perfectly matched to your logo** and your selected product.

We are experts in a wide range of printing processes and additionally develop and invest in highly specialised machines of the future.

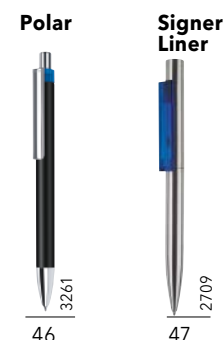

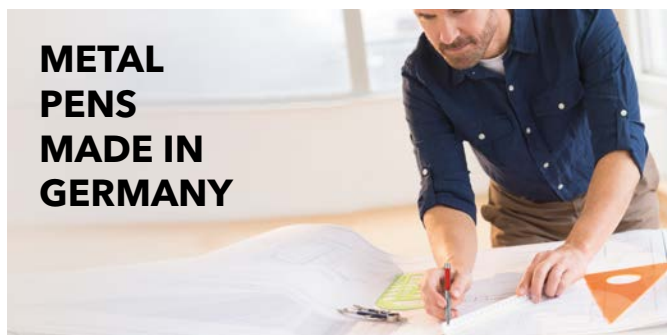

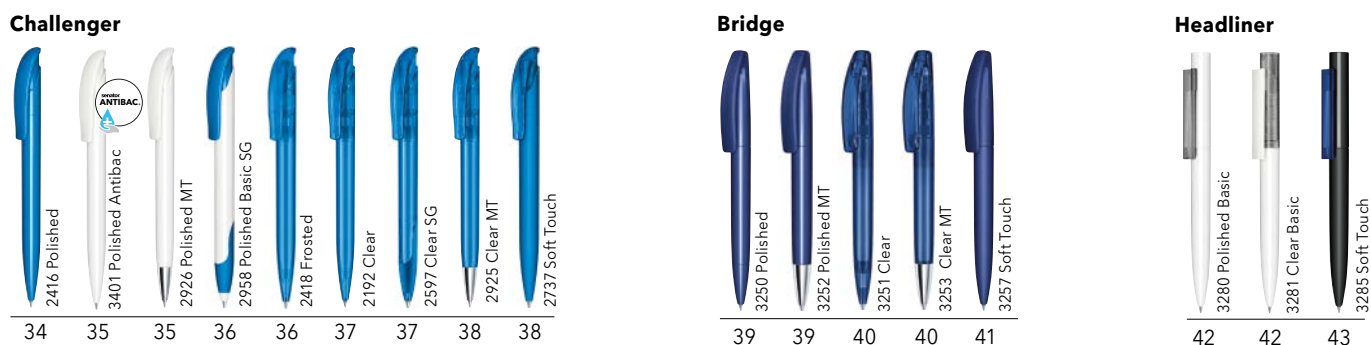

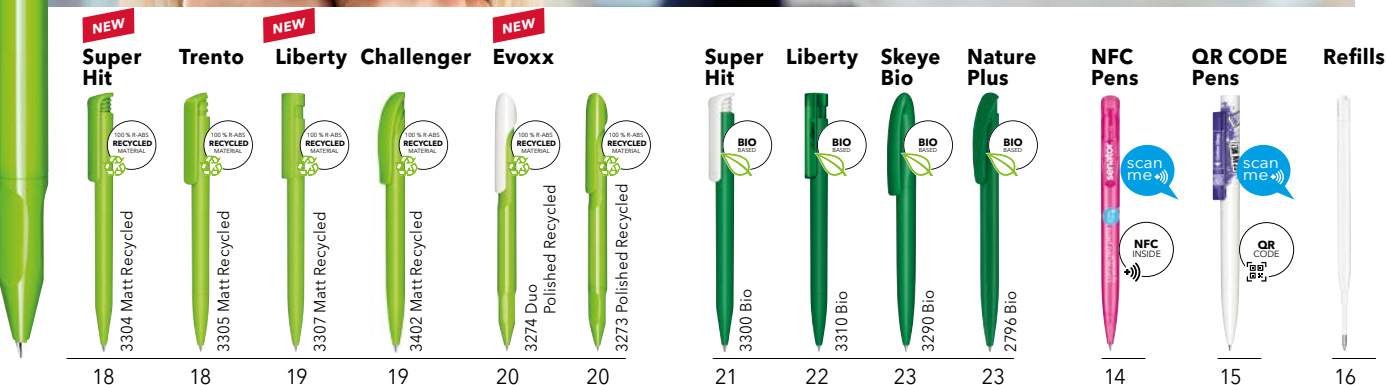

We also print in our own print shops in our subsidiaries in France and the UK, and we can respond to customer needs with more flexibility and reduce local lead times.

SERVICES

CUSTOMISED COLOURS

MIX & MATCH SERVICE

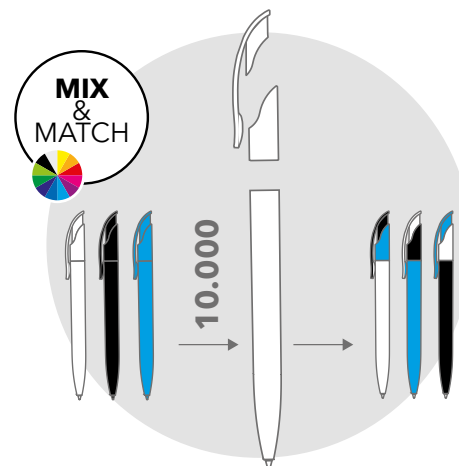

Would you like a different colour combination for your favourite pen? Then the senator® Mix & Match service is just right for you. Combine the colours of our catalogue products freely according to your wishes and your corporate design. Parts of the different finishes polished, matt, clear and frosted can also be freely combined with each other and even supplemented with a metal tip if available.

We produce all plastic parts ourselves. This means that we can produce and combine the parts in the corresponding colours for you from a quantity **of 10,000 pieces**. This opens up almost **limitless possibilities** for your very own personalised ball pens.

An example:

The Bridge model consists of 3 parts, each of which is available in 15 colours, with the tip additionally available in a metal version.

This opens up 3,600 possible combinations for this model. And all that **at no extra charge**.

All articles marked with this logo can be combined individually in their colours.

MODELS

These five senator® models offer the possibility of individual combinations. Pick your favorite design and combine the parts of all standard models of the same design.

We will also be happy to help you select your desired model. Please contact us.

CUSTOMISED COLOURS

COLOURING ACCORDING TO PMS SPECIFICATION

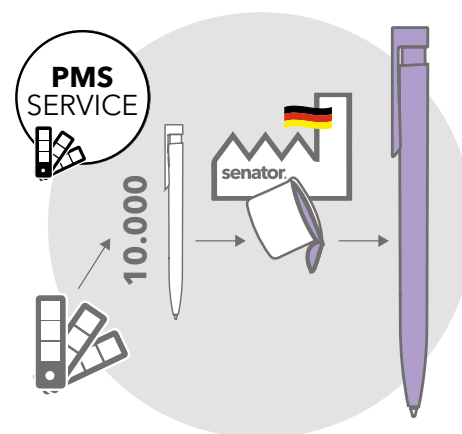

You can't find your desired colour among our catalogue products? Then use the senator® PMS service.

Tell us the PANTONE® number of your desired colour and we will produce the pen or just a specific part in your **very own personal shade**.

This is possible from a quantity of 10,000 pieces.

For approval we will send you a sample plate made in the desired colour.

Our colour references always refer to the PANTONE® Matching System, however we must point out that the product itself – because of different surfaces, lighting and materials – can differ from the colour tone printed on paper. This is why we cannot accept complaints for such deviations.

This service is available for all plastic pens.

For price information please see page 101.

FAST DELIVERY SERVICES

EXPRESS SERVICE (ONLINE PORTAL)

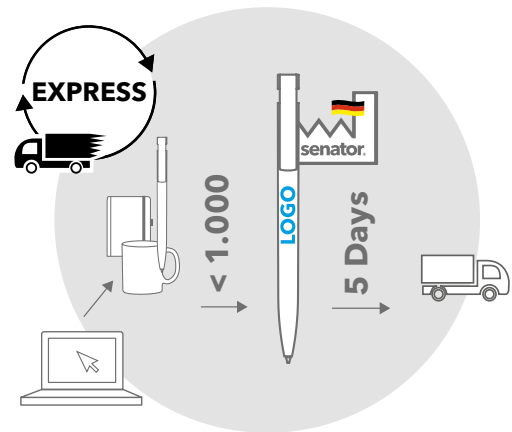

my.senator.com

You can also simply place your orders online at any time. Including print approval. Fast and easy.

With the integrated configurator, you can create the finished print data at the same time. This saves further coordination processes and leaves you time to take care of your customers.

- We produce all articles within **5 working days**
- **Plastic pens from 50 pieces**, incl. digital print
- **Metal pens from 10 pieces**, incl. laser engraving
- **Mugs from 6 pieces**, incl. sublimation print
- **Notebooks from 10 pieces**, incl. laser engraving
- **Free printed samples** also available.

All products marked with the logo "EXPRESS" are available online at my.senator.com.

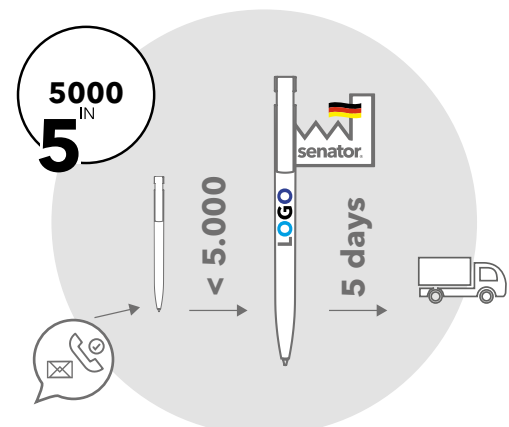

5,000 BALL PENS IN 5 DAYS

This offer is valid for our Germany based customer.

Take advantage of the unique senator® "5000 in 5" services. All of your orders for volumes of up to 5,000 pieces will be produced in Germany within 5 days, including up to 5-colour printing, packaging and ready for dispatch.

- **5 days production period** from approval of the artwork until 12:00 pm
- **Up to 5,000 ball pens**
- Up to **5 colour printing** (standard print, 1 position)
- Valid for all colours of the respective model
- Blue ink

For price information please see page 101.

All products marked with the logo "5000 in 5" can be 5-colour-printed within 5 days.

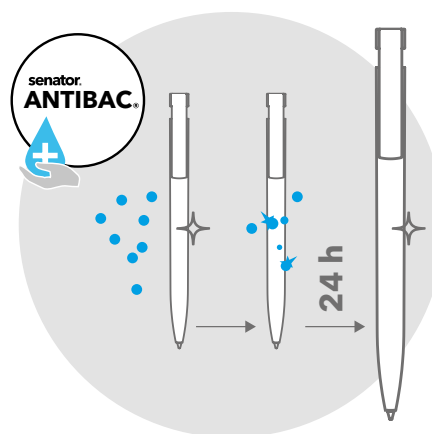

BALL PENS WITH ANTIBACTERIAL EFFECT

The senator® Antibac® range offers antibacterial and antiviral protection of the surface for the entire lifetime of the pen. Available in three popular designs.

WHAT IS SENATOR® ANTIBAC®?

- senator® Antibac® is a ball pen with antibacterial and antiviral protection on the surface.
- This reduces the spread of germs, as they cannot survive on the special surface.
- The active ingredient is processed in the plastic material and can therefore neither be rubbed off nor reduced by other external conditions.

Germs that settle on the surface cannot survive.

WHICH ACTIVE INGREDIENT DO WE USE?

- We use a plastic from Germany enriched with silver compounds.
- All plastic parts have an antibacterial effect, tested according to ISO 22196 and an antiviral effect, tested in accordance with ISO 21702.
- senator® Antibac® offers antibacterial protection of 99.9 % up to 24 hours and an antiviral protection up to 12 hours.

Suitable for everyday use and effective at all times.

MODELS

Three popular senator® designs are available as Antibac variant available. Marked in this catalogue with the logo "ANTIBAC".

CONNECTED PENS

BALL PENS WITH NFC FUNCTION

Use the senator® Challenger pens with an integrated NFC tag and transmit additional digital information.

As soon as you hold an NFC-enabled smartphone to the pre-programmed NFC tag, you will see the additional information linked to the chip – individually tailored to your wishes, always up to date and can be changed at any time.

THE SENATOR® CONNECTED PEN PACKAGE

1. We equip your Challenger with a clever NFC tag.
2. When placing your order, you send us the **link of your choice** to which the chip should refer.
3. The ball pen is thus already coded on delivery and **immediately ready for use**. With your individual log-in data **you can change the link any time**.
4. The **printed NFC scan logo** informs the user of the digital function.

PROMOTIONAL GIFT
AWARD 2021

EXAMPLE APPLICATIONS

- **Business cards**
With all important contact information including a call function
- **Videos**
To your product and service range
- **Sales documents**
Price lists, catalogues, flyers always available
- **Special Offers**
With special discount code to redeem with the ball pen

For price information please see page 101.

MODELS

Each of our Challenger Clear models can be equipped with an NFC tag.

Marking on the back.

Challenger Clear, page 37

Challenger Clear SG, page 37

Challenger Clear MT, page 38

BALL PENS WITH QR CODE

In addition to the NFC pen, the senator® QR code ball pens offer you another option for a quick and contactless transfer of additional information.

QR codes have been established as a printing option at senator® for several years. Now, new and revolutionary applications can be linked with QR codes.

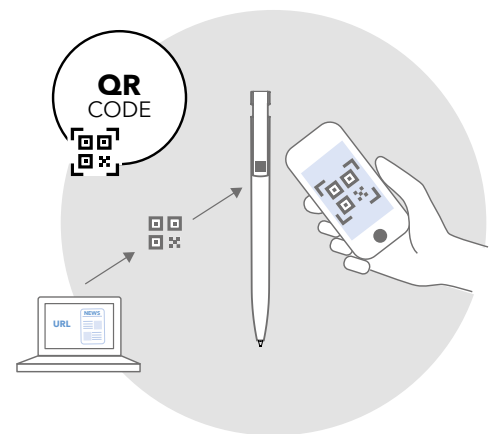

THE SENATOR® QR CODE PEN PACKAGE

1. Send us the **link of your choice** for your personalised QR code when placing your order.
2. We create your very own QR code, according to CI specifications and the **best possible readability**.
3. We print the QR code in best digital print quality, **without additional costs.***
4. The ball pen is then **immediately ready for use**.

EXAMPLE APPLICATIONS

- **Business cards**
With all important contact information including a call function
- **WiFi Connection**
With direct access to the corresponding Wi-Fi network (e.g. hotel industry)
- **Social Media Channels**
All information/news on your product and service range
- **Events**
Announce your trade fairs with all important data

*The QR code is equivalent to a digital print on the clip and can also be applied as part of your logo print at **no extra cost**.

Also possible on coloured and transparent clips as long as the print colour is of sufficient contrast to the clip colour.

MODELS

All items in this catalogue marked with the "QR CODE" logo can easily be provided with a QR code print on the clip.

MADE IN GERMANY

FREE REPLACEMENT REFILL

Once the refill is empty, it is easy to extend its life span. We offer all users of our writing instruments from Europe the opportunity to order a free replacement refill via our website **refills.senator.com**. You only pay a shipping fee of 1 £.

This avoids waste, protects the environment and extends the advertising life of your ball pen many times over.

refills.senator.com

senator® magic flow

A high quality refill ensures a more pleasurable writing experience and guarantees higher levels of exposure and a better economic return for brands. As a specialist in plastics processing, we also produce our X20 and G2 plastic refills **in our own factory in Germany**.

The **senator® magic flow G2** refill belongs to the best of its class:

- **High class quality ball point**
- **Compliant** to ISO-12757-2 and tested under stringent quality criteria to the highest standards
- **In two sizes:**
 - 1.0 mm for all who prefer a clear and fine line
 - 1.4 mm for all those who love more ink flow and thus even smoother writing
- Thanks to the quality ballpoint and **premium-quality German ink** the writing is exceptionally smooth and even
- Our refill promise: **up to 5 years of writing power** of our G2 refills

8062 **senator® magic flow X20 refill (1.0 mm)**
Blue or black, writing length up to 2 km

8004 **senator® magic flow G2 refill (1.0 mm)**
Blue or black, writing length up to 5 km

8080 **senator® magic flow G2 refill (1.4 mm)**
Blue or black, writing length up to 3.5 km

8068 **senator® magic flow metal refill, G2**
Blue or black, writing length up to 8.5 km

BIOBASED PLASTICS AND RECYCLED PLASTICS

At senator® we actively follow the latest Research and Development in alternative materials to reduce the CO₂ footprint and see these developments very positively! Currently, we are already processing bio-based plastics from sugar cane in four successful ball pen models and producing five models from post-industrial recycled plastic.

BIOBASED PLASTICS (PLA)

We use a PLA based on renewable resources for our bio products. Our PLA is made from sugar cane. One of the most efficient raw materials for PLA production.

RECYCLED PLASTICS (R-ABS)

We use an ABS recompound based on >95% recycled material. This means reusing industrial production remnants and waste, returns and everyday products.

Source	Renewable raw material with a biobasis
Material basis	PLA (poly lactic acid from sugar cane)
Core characteristics	Pleasant feel and natural colours
CO ₂ footprint	CO ₂ reduced, as up to 85 % is organic / renewable

Genuinely recycled plastic from durable articles
ABS (Thermoplastic material)
High-quality surfaces
Up to 75 % less CO ₂ compared to new ABS plastic

BRANDING METHODS ON PENS

DIGITAL PRINT

DIGITAL PRINT

Our digital print is the perfect solution to apply multicoloured prints on the clips or barrels of our ball pens. With this method we also place logos very effectively onto the cap of our Liberty models.

Technology:

The digital print uses the CMYK colour printing process to mix all colours from the basic four. For prints on coloured backgrounds we apply an extra layer of white underneath the print.

Strengths:

- Print to the edge of the clip
- Realisation of colour gradients
- Also suitable for photo-realistic themes

DIGITAL PRINT WITH 3D EFFECT

On many white barrels of our writing instruments, large-area digital prints can be supplemented with a haptic effect. Give your brand presentation noticeably more structure and shine.

Technology:

The digital print uses the CMYK colour printing process to mix all colours from the basic four. An additional lacquer layer is added on top of the print for a high-gloss raised feel effect.
Minimum quantity: 1,000 pieces

Strengths:

- Incomparable 3D effect
- Realisation of complex colour gradients
- Reproduction of countless colours

STANDARD PRINT

STANDARD PRINT

Whenever it comes to branding our ball pen barrels, screen print is the branding method of our choice. For the curved clips, on the other hand, we use tampo printing. Both processes ensure optimal implementation of your brand message.

Technology:

Screen print is a direct print process whereby ink is pressed through a mesh onto the ball pen. Tampo print is an indirect print method whereby ink is transferred from the cliché via a silicone pad onto the surface to be printed.

Strengths:

- Particularly sharp-edged prints
- Accurate full colour prints possible
- Multicolour prints possible

STANDARD PRINT WITH 3D EFFECT

The large 360° print area of our ball pen pens can be transformed into a tactile 3D surface with an additional gloss effect using an additional layer of lacquer.

Technology:

The lacquer layer substitutes one colour of the Barrel Print 360° and can be combined with prints of up to 4 colours. Minimum quantity: 1,000 pcs.

Strengths:

- Raised 3D surface
- Accentuation of selected elements
- Accurate full colour prints possible

STANDARD PRINT ON METAL

LASER ENGRAVING

STANDARD PRINT ON METAL

The surfaces of our metal pens are refined by varnishes, lacquers or other surface coatings. In order to achieve a good bonding of the ink and wear resistance on these surfaces we use our special Metal print method.

Technology:

For the printing of our metal pens, the inks used are additionally hardened to achieve long-lasting adhesion and thus advertising duration.

Strengths:

- Great on varnished surfaces
- Brilliant colours

LASER ENGRAVING

A very elegant branding method on metal surfaces. Logos or messages are very accurately and permanently worked into the metal surface.

Technology:

For our laser engraving we use a high precision computer-controlled laser which engraves the surface of our writing instruments and thus expose the metal layer underneath.

Strengths:

- A high-class and modest result
- Extremely durable
- Suitable for individual names

BRANDING METHODS ON MUGS + NOTEBOOKS

DIRECT PRINT

TRANSFER PRINT

DIRECT PRINT

The direct printing process saves time and money. We print without raster and thus achieve rich, vibrant colours. Many of our mug models can be one colour printed using this cost-effective process.

Technology:

The direct printing process does not require an intermediate step via a carrier material. The ink is applied directly to the mug without any detours.

Strengths:

- Short delivery times
- Cost-effective branding method
- Strong with line prints

TRANSFER PRINT

With transfer printing, our mugs can be printed in many different positions. Besides the classic printing position on the mug body, handle or inside printing are also very popular.

Technology:

Transfer Print is a branding method by which we first print the design on a label to be applied onto the mug in a second step. During the firing process the colour combines with the mug surface, the label dissolves up to a small edge around the print design.

Strengths:

- Endless variety
- Strong with half-tone prints
- Nearly perfect with colour gradients

SUBLIMATION

SUBLIMATION

The sublimation process uses pressure and heat to transfer the graphic onto a specially coated mug.

We offer this impressive branding method for a total of 9 different mug designs and King Can.

Strengths:

- High colour variety and brilliance
- Photo realistic prints possible
- Already available for small quantities from 36 pieces

ENGRAVING

DIGITAL PRINT

ENGRAVING

Engraving offers a high-quality and particularly durable finish. Logos or messages are very accurately and permanently worked into the metal surface.

Technology:

A computer-controlled laser engraves a logo or imprint into the item ensuring absolute definition and longlasting branding.

Strengths:

- Striking tactile results
- Understated quality
- Precise reproduction of logos and lettering

DIGITAL PRINT

Multicoloured printing can be realised quickly and cost-effectively with digital printing. With our notebooks, the surface can be used almost completely for printing. Only a small margin is necessary for technical reasons.

Technology:

The digital print uses the CMYK colour printing process to mix all colours from the basic four. For prints on coloured backgrounds we apply an extra layer of white underneath the print.

Strengths:

- Large print area
- Realisation of colour gradients
- Also suitable for photo-realistic themes

ARTWORK

GENERAL INFORMATION

Please send us your artwork in the below mention file types or send text in on of our standard typefaces.

Please also provide a print sample or proof if possible.

Please send logos and text as vectorised files or as TIF-files with 1200 dpi, in case of photos we require a resolution of 600 dpi.

Vectorised logos can be scaled without any loss in quality and are to be preferred against pixel files.

Below mentioned minimum font sizes and minimum line widths are guidelines only. Depending on the motive, branding method or product surface smaller letters and finer lines might be possible or larger letters or bigger lines might be necessary.

Proof samples

To make sure you get the best possible result we recommend the production of a sample for approval. (For production reasons slight colour deviations between a print on paper and a print on other materials are unavoidable).

File formats

Adobe Photoshop CC 2022
Adobe Illustrator CC 2022
Adobe Indesign CC 2022
Corel Draw X8
(Please convert all texts into curves)

PENS

Print colours

With the available colour shade mixing range, all Pantone C and HBP K shades can be mixed. Slight colour shade deviations between paper flags and print are unavoidable on white underground. Major colour shade deviations on an underground of a different colour shade or on a dark-shaded underground must be tolerated.

Digital print

All colours are mixed in CMYK, so it is not possible to print real PMS colours. In nearly every case the colours will be close to. Very large, uni coloured surfaces cannot be realised. Minimum size: 8 pt, minimum line width: 0.15 mm

Laser engraving

Minimum line width: 0.15 mm, Minimum front size: 6 pt

Personalisation (list of names)

Many of our products can be customised with the personal name. Please send us the names in an excel file.

Raster

Screen print: Raster of 40, colour intensity 15 - 85%.
360° barrel print: Raster of 48, colour intensity 15 - 85%

Standard Typefaces

Arial, AvantGarde, Courier, Futura, Present, Serifa, Helvetica, Times New Roman, Univers each regular, bold, italic, bold italic, BrushScript, English script ty each italic and bold italic. Other typefaces possible (only PC), please send font as True Type-face (*.ttf).
Other or similar typefaces on request.

MUGS

Direct Print

On white mugs
Minimum size 10 pt, minimum line width 0.2 mm, no raster

On coloured mugs a white layer will always have to be layed underneath:
Minimum size 24 pt, minimum line width 0.8 mm, no raster
Printing colours: black, white, matt silver and matt gold

Transfer print

Minimum size 8 pt, minimum line width 0.2 mm, printable colour intensity 15 - 85 %

Transfer print on coloured mugs

Minimum size 12 pt, minimum line width 0.35 mm, printable colour intensity 15 - 85 %.

Laser engraving on coloured mugs

Minimum size 12 pt, minimum line width 0.4 mm

Personalisation (list of names)

A great variety of our mugs can be customised with the personal name. Please send us the names in an excel file. Please note that this very special way of customisation is always possible when the name stands for itself and is not part of the remaining design.

Sandblasting

Minimum size 24 pt, minimum line width 1 mm, no raster

ADDITIONAL SURCHARGES

DELIVERIES

Labelling		
Labelling of single pens, gift boxes, polybags (10, 20, 25, 50, 100) and outer carton. Per label:	0.19	£
Labelling of Mugs		
For an additional label to the right and left of the handle with the same motif and colour, we charge per piece:	0.89	£
Delivery quantity:		
As stated in our general business terms, we reserve the right to over or under delivery. For delivery by exact number, we charge:	2% surcharge on product and branding	
Minimum order surcharge		
The minimum quantities are defined by the lowest quantity scale and packing unit per model and colour. For orders below the minimum quantity (but at least half the quantity) we charge	63.00	£
Shipping to distributor plan		
Handling fee per additional shipping address, packing included (plus shipping costs):	10.00	£
Change of ball pen or rollerball refill per piece:		
Minimum quantity for plastic pens: 1,000 pcs.	0.19	£
Minimum quantity for metal pens: 100 pcs.		
For our models Super-Hit, Dart and Liberty a change of refill is not possible! The surcharge is to be understood plus price for the refill.		

PRODUCTION

Proof sample	
Proof sample per colour & position (plus product price):	50.00 £
Production sample	
Charge for production sample including freight	3.82 £
Print	
To achieve a better printing result it is sometimes recommended to print a white layer underneath the print or to apply the print twice. In these cases printing charges are invoiced once more.	
Single names on metal pens	
Please provide names in Excel file, per name	2.40 £
Surcharge for NFC Connected Pens	
senator® connected pen NFC per piece	1.05 £

PMS Service	
Almost all of our models are available in individual colours according to PMS on request. The minimum quantities are for plastics models 10,000 pieces.	
For a proof sample these costs are additional.	1.500.00 £

PACKAGING

Plastic pens	
Printed pens are packed in polybag of 100 pcs. Exception: Super-Hit and Dart are bulk packed in carton. Different packaging (e. g. 10, 25, 50 or 100 pcs. in poly bag) or in box of 50 ball pens per 100 pieces:	1.50 £
Metal pens	
are packed in a plastic tray of 10. Exception: Polar in a cardboard tray of 10
